TABLE OF CONTENTS

		PAGE
Development of cherry and peach fruits as affected by destruction of the embryo (with seven figures)	*H. B. Tukey*	1
Control of atmospheric humidity in culture studies (with eleven figures)	*Henry Hopp*	25
Anatomical structure of stems in relation to the production of flowers (with forty-three figures)	*Ocra Christine Wilton and R. H. Roberts*	45
Zinc relation in mottle-leaf of citrus (with seven figures)	*A. R. C. Haas*	65
Effect of atmospheric humidity on rate of carbon fixation by plants (with four figures)	*John W. Mitchell*	87
Floral development and vascular anatomy of the fruit of *Ribes aureum* (with thirty-seven figures)	*Tsu Kiang Yen*	105
Vascular anatomy of the seedling of *Melilotus alba* (with eighteen figures)	*Elmer B. McMurry and Emma L. Fisk*	121
Embryogeny of species of *Podocarpus* of the subgenus *Stachycarpus* (with twenty-one figures)	*J. T. Buchholz*	135
Secondary root hairs (with eight figures)	*M. Elizabeth Pinkerton*	147
Microsporogenesis and cytokinesis in *Asimina triloba* (with plate I)	*John Flowers Locke*	159
Development of the male gametes of *Lilium* (with thirty-one figures)	*D. C. Cooper*	169
Anatomical study of the seedling of *Hibiscus trionum* (with twenty-five figures)	*Anna May Kimmell*	178
Development of the macrogametophyte in certain Labiatae (with twenty-two figures)	*Elizabeth P. Bushnell*	190
Limited growth and abnormalities in excised corn root tips (with six figures)	*Wm. J. Robbins and Virginia B. White*	209

		PAGE
Effect of alternate moistening and drying on germination of seeds of western range plants (with nine figures)	*Sylvia M. Griswold*	243
Retarded germination in the seed of *Hypericum perforatum* caused by calcium (with six figures)	*H. A. Borthwick*	270
Studies on the embryogeny of the Solanaceae. I. (with sixty-one figures)	*P. N. Bhaduri*	283
Studies on *Ambrosia*. II: Effect of certain environmental factors on floral development of *Ambrosia elatior* (with sixteen figures)	*Kenneth L. Jones*	296
Lepidocarpon sporangia from the Upper Carboniferous of Illinois (with ten figures)	*Fredda D. Reed*	307
Development of the megagametophyte and embryo of *Allium mutabile* (with twenty-seven figures)	*Thomas R. Porter*	317
A fossil Araucarian embryo from the Cerro Cuadrado of Patagonia (with thirteen figures)	*Bertha Schweitzer Darrow*	328
Morphological and cultural studies of *Taphrina potentillae* (with eleven figures)	*Ella May Martin*	339
Cytological investigations of *Erechtites hieracifolia* (with thirty-seven figures)	*George Olds Cooper*	348
Cytology of certain Labiatae (with twenty-two figures)	*Elizabeth P. Bushnell*	356
Cytological studies in the Resedaceae (with thirteen figures)	*O. J. Eigsti*	363
Histological reactions of bean plants to indoleacetic acid (with thirty-three figures)	*E. J. Kraus, Nellie A. Brown, and K. C. Hamner*	370
Is protoplasm elastic? (with one figure)	*Henry T. Northen*	421
Offspring of a self-pollinated reversed carpellate plant of *Morus alba*	*John H. Schaffner*	425
Physiological studies with the nitrogen-fixing alga, *Nostoc muscorum* (with nine figures)	*Franklin E. Allison, Sam R. Hoover, and Herman J. Morris*	433

		PAGE
Nutritional levels in the peanut plant (with two figures)	*Rufus H. Moore*	464
Histological and microchemical studies of the reactions of tomato plants to indoleacetic acid (with twenty figures)	*H. A. Borthwick, K. C. Hamner, and M. W. Parker*	491
Effect of extracts from the corn plant on growth of excised root tips (with three figures)	*Wm. J. Robbins and Virginia B. White*	520
Secondary growth by means of a thickening ring in certain monocotyledons (with plates II, III)	*Vernon I. Cheadle*	535
Morphological and cytological studies of *Calla palustris* (with plates IV, V, and text figures)	*Margaret G. Dudley*	556
Structure of Paleozoic seeds of the Trigonocarpales (with thirty-six figures)	*Charles L. Deevers*	572
Embryo abortion in the peach in relation to chemical composition and season of fruit ripening (with two figures)	*H. B. Tukey and F. A. Lee*	586
Hydathodes in the genus *Equisetum* (with eight figures)	*Marion A. Johnson*	598
Forms of *Crataegus crus-galli*	*H. W. Rickett*	609
Zinc as a nutrient for plants (with five figures)	*W. H. Chandler*	625
Relation of nutrition of tomato to disposition to infectivity and virulence of *Fusarium lycopersici* (with seven figures)	*William S. Cook*	647
Equipment for growing plants in nitrogen fixation studies (with three figures)	*C. A. Ludwig*	670
Experiments concerning diffusion of nitrogenous compounds from healthy legume nodules or roots (with two figures)	*C. A. Ludwig and Franklin E. Allison*	680
Persistent juveniles among the cycads (with sixteen figures)	*M. A. Chrysler*	696
Seedling anatomy of *Cynara scolymus* (with twenty-two figures)	*Walter S. Phillips*	711

		PAGE
Potassium and calcium in relation to nitrogen metabolism	*G. T. Nightingale*	725
Histological reactions of bean plants to growth promoting substances (with fifty-three figures)	*K. C. Hamner and E. J. Kraus*	735
Morphology of *Cupressus arizonica:* gametophytes and embryogeny (with fourteen figures)	*Clifton C. Doak*	808
Responses of bean and tomato to *Phytomonas tumefaciens*, *P. tumefaciens* extracts, β-indoleacetic acid, and wounding (with twenty-two figures)	*G. K. K. Link, Hazel W. Wilcox, and Adeline DeS. Link*	816
BRIEFER ARTICLES—		
Technique for preparing microscopic sections of woody stems and roots	*W. W. Newby and Perry Plummer*	198
Further observations on *Gonyostomum semen*	*Francis Drouet and Aaron Cohen*	617
